PARKER

EST. 1888

“A signature always reveals a man’s character and sometimes even his name” : Evan Esar.

A signature is the unique identity created over years that exude our personality. It is our mark of promise, which often reveals how we want the world to perceive us.

For the young and aspiring, signature holds solemnity and novelty.

For over a century, Parker Pens have been recognized for their dependable quality, precision writing, and prestigious style. A stroke of genius, Parker Pens was introduced in India in 1996 by Luxor and since then it is the first choice for young and aspiring when it comes to marking a milestone with a signature.
